

FREQUENCY DICTIONARY
OF THE
HEBREW BIBLE

Donald W. Parry
WordCruncher Team
Lauryn M. Wilde
Jason W. Dzubak
Monte F. Shelley
Jesse Vincent

Introduction

The *Frequency Dictionary of the Hebrew Bible* is an indispensable resource for all students of biblical Hebrew. It provides a list of all 9,369 words attested in the Hebrew Bible, together with invaluable statistical information. The list is ranked numerically, starting with the most frequent word in the Hebrew Bible. Each entry contains a word's numerical rank, rate of occurrence, cumulative percentage, and English definition. This information is easily accessible. Beginning students may want to focus on the most frequently attested words (e.g., the top 400–600 words), while advanced students may desire to study less frequently attested words.

It is exceptionally significant that the top twenty-eight Hebrew words (and verbal roots) in the *Frequency Dictionary* constitute 50.21% of all words in the Hebrew Bible! Here are three examples:

- The most frequent word in the Hebrew Bible is ו (meaning “and”), which occurs 50,524 times (11.68% of all Hebrew words).
- The second most frequent word is ה (meaning “the”), which appears 30,477 times (7.05% of all words). The cumulative percentage of the top two words—ו (“and”) and ה (“the”)—represents 18.73% of the total words in the Hebrew Bible.
- A significant word in the Hebrew Bible is the Divine Name יהוה (the Tetragrammaton), which many English versions of the Bible translate as *LORD*. This name is attested 6,828 times. *By learning just these three words—יהוה, ו, and ה—students can translate 87,829 words of the Bible!*

In our view, students who learn the most frequently attested vocabulary words will have a much greater capacity to translate the Hebrew Bible—more quickly and more accurately.

Notes to help you navigate the *Frequency Dictionary of the Hebrew Bible*:

- 1) In the Hebrew column, some entries have a number next to it, e.g., entry number 5 reads **1** אֵל. The number 1 indicates that this is the first definition of the word אֵל. The second definition is labeled **2** אֵל, which is located further down the list of words.
- 2) In the Hebrew column, some entries have the symbol @ next to it, which indicates that the word is Aramaic.
- 3) In the Hebrew column, verbs do not have vowels, e.g., the verb “to be” appears as הָיָה.

Acknowledgments

We would like to thank many individuals for their work on the *Frequency Dictionary of the Hebrew Bible*—the WordCruncher Team in the Office of Digital Humanities at Brigham Young University (Jason W. Dzubak, director; Lauryn M. Wilde, project manager; Jesse Vincent, former project manager; and Dr. Monte F. Shelley, emeritus director); also, Emily Mehr, a graduate student at Brigham Young University. Indeed, their contributions are significant! We note that the *Frequency Dictionary* was created by a WordCruncher analysis of the Westminster Hebrew Morphology (2020, Version 4.22). Jason Dzubak converted the Westminster data to Unicode. At some point in the near future, the WordCruncher team will also create a WordCruncher version of the Westminster data for those who want to search, study, and analyze the Hebrew Bible.
